

NEW PRODUCT!

Entry Model of Speed Control Motors

DSC Series

Speed Control Motor and Controller Package

Technical Information

Gearhead with High Permissible Torque and High Strength

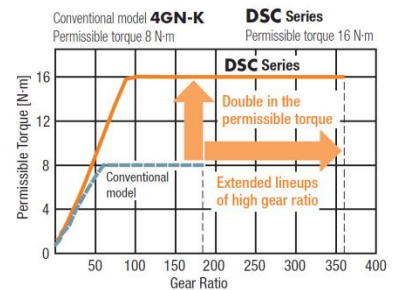

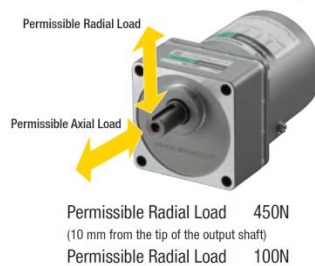

DSC Series adopt the Motor gearhead with high permissible torque and high strength, which is used in the KII Series. This gearhead uses our unique side plate, increasing the case rigidity. The gear is also strengthened by heat treatment (Carburizing and quenching).

Parallel Shaft Combination Type

[Gearhead Internal Structure]

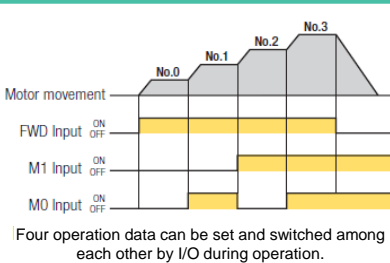

[For Gearhead with holding angle of 80 mm]

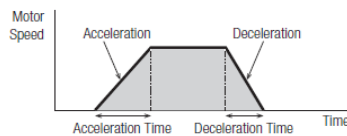

Main Functions

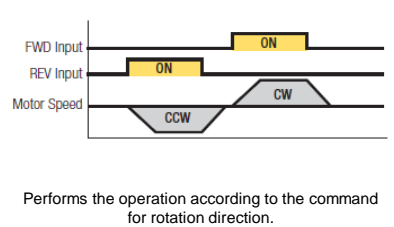

Speed Control (4-speed)

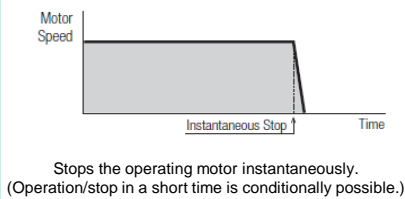

Acceleration/Deceleration

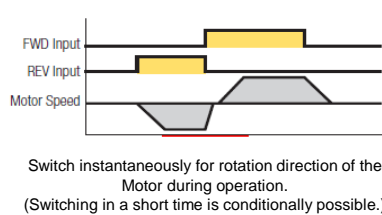

Bi-directional Operation

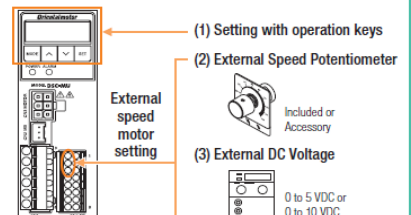

Instantaneous Stop

Instantaneous bi-directional operation

Settable External Speed
