Challenge for Standardization of Next-Generation Motors

Standard AC Motor

KII Series

Single-Phase Induction Motor

KIIS Series

Three-Phase High-Efficiency Induction Motor

Technical Information

Cost Performance

High performance at an affordable price.

This model is affordably priced, equivalent to or less than conventional models, while increasing in strength and efficiency.

Environmental Resistance

Fan-less Structure

Reduction in loss has reduced the heat generation in the motor. Therefore, the KII Series' single-phase 220/230 VAC 50 Hz type and the KIIS Series do not require the cooling fan that was installed in the conventional models of 60 W or higher, resolving the problem of raising dust.

IP66

Induction Motor Terminal Box Type

IP66 Water Resistance Specification

The sealing structure of the motor, Gearhead, and terminal box has been strengthened. The terminal box type* conforms to the IP66 rating degree of protection.

*Excluding the installation surface of the round shaft type

Main specification	●Material	Case and terminal box: Aluminum	Output shaft: S45C
		Screw: Stainless steel (Exposed part only)	
	●Surface treatment	Case and terminal box: Painted (Except the installation surface)
